

COOKIES POLICY

What are Cookies?

Cookies are small data files that websites send to your computer, where they are stored in your web browser. These files do not carry viruses or malware; they remain static and do not affect your computer's performance. Instead, cookies act as records, tracking user activity and storing relevant information that updates each time you revisit a site.

Our website may collect information about you through cookies. Different types of cookies serve distinct purposes. For example, session cookies remain active only while you browse and are automatically deleted when you leave the website.

For this policy, money laundering refers to any activity designed to conceal or misrepresent the origins of illegally obtained money, making it appear as though it comes from legitimate sources or constitutes lawful assets.

Why are cookies useful?

We use functional cookies to analyze how visitors interact with our website, allowing us to monitor and improve its performance and functionality. By quickly identifying and addressing issues, we enhance the overall user experience. These cookies help us determine which pages are most popular, assess the effectiveness of different navigation methods, and track referrals from external websites to optimize our future advertising campaigns.

Cookies also play a crucial role in storing login sessions. For example, when you log into the Members Area to deposit funds, a "session cookie" is created. This cookie enables the website to recognize that you are logged in, eliminating the need to re-enter your credentials on every new page during the funding process. Without this cookie, you would be required to input your login details repeatedly while navigating the site.

Additionally, functional cookies help remember your preferences and identify you as a user, ensuring secure and efficient platform operation. For instance, they prevent the need to enter your username each time you access our trading platform and retain your preferred settings, such as your chosen language.

Functional cookies serve various purposes, including:

- Verifying your identity and detecting your location
- Recognizing your browser type and device
- Tracking the website that referred you
- Allowing third parties to personalize content based on your preferences

This website utilizes Google Analytics, a service that Google, Inc. provides to collect and analyze user interactions. Google Analytics employs cookies to gather information, including your IP address, which is then transmitted to Google's servers for processing. This data helps generate reports on website activity, understand user behavior, and provide additional analytical services. Google may share this information with third parties if required by law or if they process data on Google's behalf. However, your IP address will not be linked to other Google-held data. By continuing to use this website, you consent to Google collecting and processing your information as outlined.

Change Settings

Please select the types of cookies you wish to allow on your device.

Functional Cookies

These cookies are essential for our website's proper functioning. Without them, certain features may not work correctly. They store temporary information, such as login credentials, and are automatically deleted when you close your browser.

Analytical cookies

Analytical cookies collect data on visitor behavior, allowing us to enhance the user experience and identify areas of the website that may require maintenance. This information is anonymous, meaning it cannot be used to identify you personally or

access details like your name or email address—it is solely used for statistical analysis. Similarly, behavioral cookies monitor your website visits and use that data to provide content tailored to your interests.

Promotional cookies

These cookies track user activity across multiple websites to deliver advertisements that are more relevant and engaging. Their goal is to enhance the user experience while maximizing value for publishers and third-party advertisers.

References Cookies

Preference cookies enable a website to remember your selections, such as your preferred language or region, allowing it to adjust its appearance and functionality to better match your preferences.

Manage Cookies

You can delete cookies anytime through your web browser's settings. Alternatively, you can disable cookies; however, this may impact the functionality of our website and others, potentially preventing you from signing in. For more information on deleting or managing cookies, visit www.aboutcookies.org.

Do Not Track (DNT) browser setting

Do Not Track (DNT) is a feature in some web browsers that, when enabled, requests websites not to track your browsing activity by third-party advertisers, social media networks, and analytics providers. However, this website does not currently support DNT requests.
